

Certified Putting Instructor (CPI) Program Frankly Academies LLC

Directions: This checklist has been designed to help you navigate through the course and it is for your own benefit only. It is not required that you complete and submit this check list, however it is suggested that you print a copy and use it to help navigate you through the certification process. Items with a box next to it must either be completed or submitted online. It is estimated that it will take you approximately 5 hours to complete the online portion of the CPI certification. Even though you could complete the entire online portion of the course in one sitting, for best results it is suggested that you take a minimum of two weeks or so to complete the certification. This will allow you more time to digest the information contained in the course, ask questions and absorb the overall course experience.
